## Advanced Performance of Copper Alloys

Guest Editor:

**Dr. Qian Lei**

Powder Metallurgy Research  
Institute, Central South  
University, Changsha 410083,  
China

Deadline for manuscript  
submissions:

**30 June 2024**

### Message from the Guest Editor

Dear Colleagues,

Copper alloys have a series of excellent properties, such as high electrical conductivity, thermal conductivity, strength, and corrosion resistance, and are also easy to process. However, existing copper alloys and their related materials have not been able to keep up with the rapid development of high-tech industries such as electronic and electrical engineering, mobile communications, new energy vehicles, aerospace, and rail transportation. Therefore, it is important to develop new copper alloys with more advanced properties. The purpose of this Special Issue is to unite researchers in the field of copper alloys with the latest original research results and provide a reference for future studies on high-performance copper alloys.

# Special Issue

an Open Access Journal by MDPI

## Editors-in-Chief

### **Prof. Dr. Hugo F. Lopez**

Department of Materials Science  
and Engineering, College of  
Engineering & Applied Science,  
University of Wisconsin-  
Milwaukee, 3200 N. Cramer  
Street, Milwaukee, WI 53211, USA

### **Prof. Dr. Yong Zhang**

Beijing Advanced Innovation  
Center of Materials Genome  
Engineering, State Key  
Laboratory for Advanced Metals  
and Materials, University of  
Science and Technology Beijing,  
30 Xueyuan Road, Beijing 100083,  
China

## Message from the Editorial Board

Metallic materials play a vital role in the economic life of modern societies; contributions are sought on fresh developments that enhance our understanding of the fundamental aspects related to the relationships between processing, properties and microstructure – disciplines in the metallurgical field ranging from processing, mechanical behavior, phase transitions and microstructural evolution, nanostructures, as well as unique metallic properties – inspire general and scholarly interest among the scientific community.

## Author Benefits

**Open Access:** free for readers, with **article processing charges (APC)** paid by authors or their institutions.

**High Visibility:** indexed within **Scopus**, **SCIE (Web of Science)**, **Inspec**, **CAPLUS / SciFinder**, and **other databases**.

**Journal Rank:** JCR - Q2 (*Metallurgy & Metallurgical Engineering*) / CiteScore - Q1 (*Metals and Alloys*)
