an Open Access Journal by MDPI

## Editor-in-Chief

Prof. Dr. Martin von Bergen

## Message from the Editor-in-Chief

“Microorganism” merges the idea of the very small with the idea of the evolving reproducing organism is a unifying principle for the discipline of microbiology. Our journal recognizes the broadly diverse yet connected nature of microorganisms and provides an advanced publishing forum for original articles from scientists involved in high-quality basic and applied research on any prokaryotic or eukaryotic microorganism, and for research on the ecology, genomics and evolution of microbial communities as well as that exploring cultured microorganisms in the laboratory.

## Author Benefits

-  **Open Access** Unlimited and free access for readers
-  **No Copyright Constraints** Retain copyright of your work and free use of your article
-  **Thorough and Rapid Peer-Review**
-  **Fast Publication upon Acceptance**
-  **No Space Constraints, No Extra Space or Color Charges** No restriction on the length of the papers, number of figures or colors
-  **Major Forum for Readers Interested in Diverse Aspects of Microorganisms**
-  **Discounts on Article Processing Charges (APC)** If you belong to an institute that is part of MDPI's institutional membership program

## Aims and Scope

*Microorganisms* publishes original research, reviews, short communications, and commentaries. It aims to provide a broad forum for research discoveries involving all types of microorganisms and microbial communities, as well as diverse scientific methods used in their studies.

The scope of *Microorganisms* includes:

- Bacterial, archaeal and eukaryotic cellular microorganisms, and non-cellular transmissible agents such as viruses and prions
- Microbial ecology of environmental microbial communities
- Microbial diversity including molecular diversity and metagenomics
- Microbial physiology and biochemistry
- Applied microbiology and biotechnology
- Microbial genetics
- Medical and pharmaceutical microbiology
- Evolutionary microbiology
- Industrial microbiology
- Agricultural microbiology
- Food microbiology
