Deadline for manuscript
submissions:

closed (28 February 2022)

Message from the Guest Editor

Dear Colleagues,

The Special Issue "Fungal and Polymicrobial Biofilms" aims to understand biofilms formed by fungal species, with an emphasis on those species that cause infection in humans. This includes but is not limited to *Candida albicans*, one of the major fungal biofilm-formers in humans, as well as interacting fungal and bacterial species that together form polymicrobial biofilms.

I would like to invite you to submit research articles, review articles, and short communications on topics pertaining to fungal biofilms and polymicrobial biofilms.

Prof. Dr. Clarissa J. Nobile

Message from the Editor-in-Chief

"Microorganism" merges the idea of the very small with the idea of the evolving reproducing organism is a unifying principle for the discipline of microbiology. Our journal recognizes the broadly diverse yet connected nature of microorganisms and provides an advanced publishing forum for original articles from scientists involved in high-quality basic and applied research on any prokaryotic or eukaryotic microorganism, and for research on the ecology, genomics and evolution of microbial communities as well as that exploring cultured microorganisms in the laboratory.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, AGRIS, and other databases.

Journal Rank: JCR - Q2 (*Microbiology*) / CiteScore - Q2 (*Microbiology (medical)*)
