Deadline for manuscript
submissions:

closed (31 December 2024)

Message from the Guest Editors

Dear Colleagues,

It is widely acknowledged that water quality plays a crucial role in the success of flotation. The low availability of freshwater resources near mining locations in some parts of the world poses a significant threat to froth flotation, as water acts as both a reagent and a transport medium. In mining regions where the availability of fresh water is scarce, alternative sources such as treated sewage effluent, groundwater, and seawater are being explored for their suitability in the process. Other strategies focus on managing existing process water through recycling, reuse, and reduction.

We therefore invite you to submit manuscripts on the topic of water in flotation, which may include the following:

- The treatment of water from flotation tailings and concentrates before reuse;
- The dewatering of tailings and concentrates;
- Novel techniques and instruments used to monitor water quality in flotation.

We look forward to receiving your valuable contributions!

Editor-in-Chief

Message from the Editor-in-Chief

Minerals welcomes submissions that report basic and applied research in mineralogy. Research areas of traditional interest are mineral deposits, mining, mineral processing and environmental mineralogy. The journal footprint also includes novel uses of elemental and isotopic analyses of minerals for petrology, geochronology and thermochronology, thermobarometry, ore genesis and sedimentary provenance. Contributions are encouraged in emerging research areas such as applications of quantitative mineralogy to the oil and gas, manufacturing, forensic science, climate change, geohazard and health sectors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), GeoRef, CaPlus / SciFinder, Inspec, Astrophysics Data System, AGRIS, and other databases.

Journal Rank: JCR - Q2 (Mining and Mineral Processing) / CiteScore - Q1 (Geology)
