# **Dewatering of Fine Mineral Tailings**

Guest Editor:

### Dr. Ataollah (Ata) Nosrati

School of Engineering, Edith Cowan University, Joondalup WA 6027, Australia

Deadline for manuscript submissions:

closed (31 August 2018)

# Message from the Guest Editor

This Special Issue aims to bring together new and innovative studies in the area of dewatering of fine mineral slurries and tailings, to review the current state of knowledge and to develop improvements in current schemes. We welcome all studies relevant to this area.

The keywords are:

- mineral processing
- dewatering
- mineral slurries
- fine slurries
- fine tailing
- mine tailings
- tailings disposal
- particle interaction
- rheology of mineral slurries
- sedimentation
- consolidation
- process water recycle
- clay mineral
- environmental risk mitigation
- flocculant-mediated dewatering
- gravity sedimentation; thickening

## **Message from the Editor-in-Chief**

Minerals welcomes submissions that report basic and applied research in mineralogy. Research areas of traditional interest are mineral deposits, mining, mineral processing and environmental mineralogy. The journal footprint also includes novel uses of elemental and isotopic analyses of minerals for petrology, geochronology and thermochronology, thermobarometry, ore genesis and sedimentary provenance. Contributions are encouraged in emerging research areas such as applications of quantitative mineralogy to the oil and gas, manufacturing, forensic science, climate change, geohazard and health sectors.

#### **Author Benefits**

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), GeoRef,

CaPlus / SciFinder, Inspec, Astrophysics Data System, AGRIS, and other databases.

**Journal Rank:** JCR - Q2 (*Mining & Mineral Processing*) / CiteScore - Q2 (*Geology*)
