Deadline for manuscript
submissions:

closed (31 December 2024)

Message from the Guest Editors

Dear Colleagues,

We aim to publish a Special Issue that presents a set of themed articles on “Comminution and Comminution Circuits Optimisation”. Our Special Issue will cover a broad range of relevant topics, such as:

- The effects of mill or crusher operational parameters (mill speed, feed rate, slurry filling, liner configuration, residence time, ball filling, and ball size distribution), and an exit classification toward an optimised circuit;
- The application of mathematical modelling for comminution equipment and for circuit optimisation;
- Optimisation based on product size distribution and liberation;
- The use of DEM, CFD, and other numerical methods to optimise equipment and milling circuits;
- Ore testing and material characterisation;
- Ore testing and scale-up;
- Ore sampling and circuit optimisation;
- Development of new comminution equipment.

Message from the Editor-in-Chief

Minerals welcomes submissions that report basic and applied research in mineralogy. Research areas of traditional interest are mineral deposits, mining, mineral processing and environmental mineralogy. The journal footprint also includes novel uses of elemental and isotopic analyses of minerals for petrology, geochronology and thermochronology, thermobarometry, ore genesis and sedimentary provenance. Contributions are encouraged in emerging research areas such as applications of quantitative mineralogy to the oil and gas, manufacturing, forensic science, climate change, geohazard and health sectors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), GeoRef, CaPlus / SciFinder, Inspec, Astrophysics Data System, AGRIS, and other databases.

Journal Rank: JCR - Q2 (Mining and Mineral Processing) / CiteScore - Q1 (Geology)
