Deadline for manuscript
submissions:

closed (31 December 2017)

Message from the Guest Editor

Dear Colleagues,

Heterocycles are ubiquitous building blocks in natural and unnatural medicinal compounds and functional materials. The focus of this Special Issue is to present short papers describing novel synthetic approaches to heterocyclic structures of value in these areas. Efficient procedures to access ring systems containing one or more heteroatoms (particularly, N, O and S, as well as others) are welcome. Contributions should be written as single-compound preparations and should target new compounds of high value. Previously-described structures will only be considered if they have proven value and if a significant improvement has been made in the synthetic approach. Sufficient experimental details should be included to facilitate other researchers in accessing each compound and characterization data should be included.

Message from the Editor-in-Chief

Molbank is a unique electronic journal that rapidly publishes very short articles, which typically encompass one compound per paper (“short notes”) as well as “communications”. The aim of this format is to prevent potentially useful scientific information from being lost. In many research groups, there are unpublished compounds that are available, which do not truly fit into a full paper or even a conventional short paper, e.g. because the main work in a series of compounds has already been published. Nevertheless, somebody else might be interested in just this particular compound. Molbank offers an excellent platform for preserving the aforesaid kind of information.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [ESCI \(Web of Science\)](#), [Reaxys](#), [CAPus / SciFinder](#), and [other databases](#).

Rapid Publication: manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.5 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the second half of 2023).
