an Open Access Journal by MDPI

Academic Open Access Publishing  
since 1996

## Editor-in-Chief

Dr. Derek J. McPhee

## Associate Editors

Prof. Dr. Fernando Alberici  
Prof. Dr. Maurizio Battino  
Dr. John A. Beutler  
Dr. Jean Jacques Vanden Eynde  
Prof. Dr. Curt Wentrup

## Section Editor-in-Chief

Prof. Dr. Diego Muñoz-Torrero  
Prof. Dr. Roman Dembinski  
Prof. Dr. Thomas J. Schmidt  
Dr. James W. Gauld  
Dr. Pierre Pichat  
Dr. Arnaud Gautier

## Message from the Editor-in-Chief

As the premier open access journal dedicated to experimental organic chemistry, and now in its 20th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts and novel materials. Pushing the boundaries of the discipline, we invite papers on multidisciplinary topics bridging biochemistry, biophysics and materials science, as well as timely reviews and topical issues on cutting edge fields in all these areas.

## Author Benefits

-  **Open Access** Unlimited and free access for readers
-  **No Copyright Constraints** Retain copyright of your work and free use of your article
-  **Impact Factor 2.465** (2015 Journal Citation Reports®)
-  **Thorough Peer-Review**
-  **Coverage by Leading Indexing Services** SCIE-Science Citation Index Expanded (Clarivate Analytics, formerly Thomson Reuters), MEDLINE (NLM), Pubmed (NLM), Scopus (Elsevier)
-  **No Space Constraints, No Extra Space or Color Charges** No restriction on the length of the papers, number of figures or colors
-  **Discounts on Article Processing Charges (APC)** If you belong to an institute that participates with the MDPI membership program

## Aims and Scope

Authors are encouraged to publish full details of synthetic procedures and characterization information. There is no restriction on the length of the experimental section. Availability of compound samples is considered important information.

The scope of *Molecules* includes:

- Compound preparation and structural elucidation
- Natural product isolation and characterization
- Chemical and biological activities
- Applications as functional materials, additives, catalysts, etc.
- Combinatorial synthesis and parallel synthesis
- Combinatorial compound libraries and molecular diversity assessments
- Compound database design and management

*Molecules* regularly publishes special issues on relevant and timely topics. Check our website for an updated list of special issues.
