

an Open Access Journal by MDPI

## Featured Reviews in Organic Chemistry

Guest Editors:

**Prof. Dr. Roman Dembinski**

Department of Chemistry,  
Oakland University, 146 Library  
Drive, Rochester, MI 48309-4479,  
USA

**Prof. Dr. Vadim A. Soloshonok**

Department of Organic  
Chemistry I, University of Basque  
Country, San Sebastian, Spain

Deadline for manuscript  
submissions:

**closed (30 April 2023)**

### Message from the Guest Editors

This Special Issue of *Molecules* (MDPI) is seeking contributions reviewing any area of research in organic chemistry that has a broad appeal and is positioned within the scope of the Journal. The summaries of the most recent, innovative developments in organic chemistry, synthesis, etc., are currently welcome. The contributions shall critically summarize a range of organic studies, methodologies; or reactions; examine previously unaddressed aspects; propose and develop new approaches; exchange perspectives, or encourage new lines of studies. Beyond the classical areas, other specific subfields including but not limited to catalysis, flow; mechanochemistry; medicinal chemistry; bioorganic chemistry or interdisciplinary studies are sought. The major goal of this Issue is to collect concise articles from prominent authors representing creative dynamics in the broad field of organic chemistry. We hope your well-regarded research group will be part of this prestigious, visible, publisher-promoted Special Featured Reviews Issue.

# Special Issue

an Open Access Journal by MDPI

## Editor-in-Chief

### Prof. Dr. Thomas J. Schmidt

Institute of Pharmaceutical  
Biology and Phytochemistry,  
University of Münster,  
Corrensstrasse 48, D-48149  
Münster, Germany

## Message from the Editor-in-Chief

As the premier open access journal dedicated to experimental organic chemistry, and now in its 25th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts and novel materials. Pushing the boundaries of the discipline, we invite papers on multidisciplinary topics bridging biochemistry, biophysics and materials science, as well as timely reviews and topical issues on cutting edge fields in all these areas.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Reaxys](#), [CaPlus / SciFinder](#), [MarinLit](#), [AGRIS](#), and [other databases](#).

**Journal Rank:** JCR - Q2 (*Chemistry, Multidisciplinary*) / CiteScore - Q1 (*Chemistry (miscellaneous)*)
