Message from the Guest Editor

Honey and bee products, including propolis, bee pollen, bee bread, and royal jelly, as well as bee venom are a rich source of many substances with biological activity. These products have been used since ancient times due to their curative and pro-health properties, which cover a broad spectrum of antiradical, antioxidant, antibacterial, anticancer and adjuvant effects in the prophylaxis and treatment of many diseases. Bee products can also be attractive components of functional food, due to their significant activity. The purpose of this Special Issue is to identify and review the latest research results on bioactive components of honey and bee products that have a beneficial effect on the human health.

Contributions for this issue, both in form of review articles and original research, are welcome. They may cover all aspects of honey and bee products, including composition, chemistry, analysis, impact on the human health and application in the human diet.

Message from the Editor-in-Chief

As the premier open access journal dedicated to experimental organic chemistry, and now in its 25th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts and novel materials. Pushing the boundaries of the discipline, we invite papers on multidisciplinary topics bridging biochemistry, biophysics and materials science, as well as timely reviews and topical issues on cutting edge fields in all these areas.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Reaxys](#), [CaPlus / SciFinder](#), [MarinLit](#), [AGRIS](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Chemistry, Multidisciplinary*) / CiteScore - Q1 (*Chemistry (miscellaneous)*)
