submissions:

**closed (31 May 2022)**

### Message from the Guest Editor

Dear Colleagues,

Interest in peptide drug discovery is continuously growing in the pharmaceutical industry; thus, the number of therapeutic peptides evaluated in clinical trials is increasing. As a result, year on year, the Food and Drug Administration (FDA) and the European Medicines Agency (EMA) have approved several of these chemical entities as new drugs.

As well as being present in new drugs as active pharmaceutical ingredients (APIs), peptides are also used as shuttles to address other drugs to a specific cell or as linkers, for instance, in antibody–drug conjugates (ADCs).

This Special Issue of *Molecules*, Peptide Therapeutics 2.0, aims to highlight the newest discoveries related to peptides as therapeutic agents.

Prof. Dr. Beatriz G. De la Torre

## Message from the Editor-in-Chief

As the premier open access journal dedicated to experimental organic chemistry, and now in its 25th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts and novel materials. Pushing the boundaries of the discipline, we invite papers on multidisciplinary topics bridging biochemistry, biophysics and materials science, as well as timely reviews and topical issues on cutting edge fields in all these areas.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Reaxys](#), [CaPlus / SciFinder](#), [MarinLit](#), [AGRIS](#), and [other databases](#).

**Journal Rank:** JCR - Q2 (*Chemistry, Multidisciplinary*) / CiteScore - Q1 (*Chemistry (miscellaneous)*)
