Message from the Guest Editor

Dear Colleagues,

Saponins are a diverse group of molecules that are present in a wide variety of plants, some of which are used in traditional medicines. This Special Issue aims to attract contributions on all aspects of the chemistry and bioactivity (cells, antimicrobial, and antiviral) of saponin containing food and traditional medicines.

Message from the Editor-in-Chief

As the premier open access journal dedicated to experimental organic chemistry, and now in its 25th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts and novel materials. Pushing the boundaries of the discipline, we invite papers on multidisciplinary topics bridging biochemistry, biophysics and materials science, as well as timely reviews and topical issues on cutting edge fields in all these areas.
