

an Open Access Journal by MDPI

Advanced Nanotechnology, Innovative Nanomaterials and Their Environmental Applications

Guest Editors:

Prof. Dr. Changlei Xia

College of Materials Science and
Engineering, Nanjing Forestry
University, Nanjing 210037, China

Dr. Yassine Kadmi

Faculty of Sciences and
Technologies, University of Lille,
Lille, France

Deadline for manuscript
submissions:
closed (23 January 2024)

Message from the Guest Editors

We would like to invite all scholars in the field of nanotechnology and nanomaterials for environmental application, especially the participants of the 2nd International Conference on Science, Engineering, and Advanced Technology (ICSEAT-2023) (<http://sciences-congress.com/>) to submit their original research papers, and reviews to this Special Issue of *Nanomaterials*, entitled “Advanced Nanotechnology, Innovative Nanomaterials, and Their Environmental Applications”.

We invite all the prospective participants to submit original and scientific studies related to, but not limited to, the following topics:

- Advanced Oxidation Technology;
- Engineering Nanoparticles for Photocatalytic Applications;
- Water/Wastewater Treatment and Process Technology;
- Green Chemistry and Clean Technology;
- Energy, Bioenergy, and Renewable Energy;
- Science, Technology, and Sustainability Engineering.

Note: we will provide 15% discount on APC for the participants of the 2nd International Conference on Science, Engineering, and Advanced Technology.

of California Davis, One Shields
Avenue, Davis, CA 95616-5270,
USA

Message from the Editor-in-Chief

Nanoscience and nanotechnology are exciting fields of research and development, with wide applications to electronic, optical, and magnetic devices, biology, medicine, energy, and defense. At the heart of these fields are the synthesis, characterization, modeling, and applications of new materials with lower nanometer-scale dimensions, which we call “nanomaterials”. These materials can exhibit unusual mesoscopic properties and include nanoparticles, coatings and thin films, metal-organic frameworks, membranes, nano-alloys, quantum dots, self-assemblies, 2D materials such as graphene, and nanotubes. Our journal, *Nanomaterials*, has the goal of publishing the highest quality papers on all aspects of nanomaterial science to an interdisciplinary scientific audience. All of our articles are published with rigorous refereeing and open access.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [PMC](#), [CAPus / SciFinder](#), [Inspecc](#), and [other databases](#).

Journal Rank: JCR - Q1 (*Physics, Applied*) / CiteScore - Q1 (*General Chemical Engineering*)
