Message from the Guest Editor

Dear Colleagues,

This Special Issue seeks submissions that address environmental applications and implications of nanotechnology. To make green nanotechnology, this Special Issue will focus on environmental applications of engineered nanomaterials (ENMs) and biosynthesized nanomaterials (BNMs) such as inorganic nanoparticles synthesized by microorganisms, fungi, algae and plants. At the same time, we will also cover difference between ENMs and BNMs in terms of their environmental applications, behavior and effects including interactions between these nanomaterials and natural organic matter and their physicochemical transformation in aquatic environment.

Dr. Yongsheng Chen

Author Benefits

**Open Access:** free for readers, with publishing fees paid by authors or their institutions.

**High visibility:** indexed by the Science Citation Index Expanded (Web of Science), Scopus, Chemical Abstracts, INSPEC and Polymer Library. Citations available in PubMed, full-text archived in PubMed Central

**Rapid publication:** manuscripts are peer-reviewed and a first decision provided to authors approximately 23 days after submission; acceptance to publication is undertaken in 8 days (median values for papers published in this journal in 2016).
