Non-coding RNAs as Colorectal Cancer Biomarkers: Mechanisms of Action and Treatment Options

Guest Editor:

Dr. Barbara Pardini

Italian Institute for Genomic Medicine - IIGM, c/o FPO IRCCS, 10060 Candiolo, TO, Italy Message from the Guest Editor

Colorectal cancer (CRC) is the third most fatal type of cancer in both men and women globally. CRC is often diagnosed at advanced clinical stages.

Deadline for manuscript submissions:

closed (30 September 2021)

Prof. Dr. George A. Calin

Department of Translational Molecular Pathology, Center for RNA Interference and Non-Coding RNAs, University of Texas MD Anderson Cancer Center, Houston, TX 77030, USA

Message from the Editor-in-Chief

This field finally has a dedicated journal where its broad community can communicate and exchange its latest findings in one centralized place. This field was built stone by stone from the many scientific contributions from extremely diverse horizons, studying gene silencing in plants, position effect variegation in drosophila or quelling in fungi. This field has achieved maturity, but a lot remains to be discovered! Our aim is to publish manuscripts from all horizons that will have a high impact on the development of the field. Let's have fun and wish *Non-Coding RNA* a long and rewarding life!

Author Benefits

Open Access:— free for readers, with <u>article processing charges (APC)</u> paid by authors or their institutions.

High Visibility: indexed within Scopus, ESCI (Web of Science), PubMed, PMC,

CAPlus / SciFinder, and other databases. **Journal Rank:** CiteScore - Q1 (*Genetics*)
