Deadline for manuscript  
submissions:

**closed (30 September 2022)**

### Message from the Guest Editors

Dear Colleagues,

We are very excited to announce a Special Issue of *Nutrients* on “Dietary Selenium Intake and Human Health”. Selenium is an essential micronutrient that is required for the function of more than 25 proteins in the human body. These proteins have a wide range of functions, including antioxidant defences, protein folding, thyroid hormone metabolism and immune health. A number of selenoproteins remain poorly characterised and offer an exciting line of investigation. Reduced dietary selenium intake is associated with poor health right across the life span, with selenium requirements increasing during pregnancy, lactation and in older individuals.

This Special Issue of *Nutrients* will include both animal and human studies that investigate the role of dietary selenium in health and disease. It is expected that this Special Issue will include studies on a range of different physiological systems and disease states. We also welcome studies investigating selenium as a dietary intervention to improve health and studies investigating the role of novel selenoproteins in human health.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, AGRIS, and other databases.

**Journal Rank:** JCR - Q1 (*Nutrition & Dietetics*) / CiteScore - Q1 (*Nutrition and Dietetics*)
