Message from the Guest Editor

Dear Colleagues,

We are organizing a Special Issue focusing on nutritional approaches for the management of digestive disorders and gastrointestinal symptoms.

It is well established that digestive diseases and nutrition are intricately linked, whilst also exerting bidirectional effects. On the one hand, digestive disorders can lead to unhealthy dietary patterns and malnutrition. On the other hand, dietary interventions and nutrition support can have therapeutic effects on gastrointestinal diseases and their symptoms and complications.

In this Special Issue, we invite researchers to submit papers on this topic. We welcome original research articles, animal and clinical studies, as well as review articles.
