Deadline for manuscript  
submissions:

**closed (31 July 2017)**

### Message from the Guest Editor

Dear Colleagues,

China is undergoing rapid nutrition transition and is facing an epidemic of diabetes and other chronic diseases. The Chinese government has put a great effort into the monitoring of change of food consumption and burden of non-communicable chronic diseases, which is shown by the implementation of the National Nutrition Survey in 1959, 1982, 1992, 2002, and 2012. This Special Issue will welcome original research using data from the 2012 Chinese National Nutrition Survey. Manuscripts can either describe the dietary intake (nutrients, foods, and overall dietary patterns), lifestyle and burden of chronic diseases or assess the association between dietary intake/lifestyle and chronic diseases.

Dr. Zumin Shi
