Deadline for manuscript
submissions:

10 August 2024

Message from the Guest Editors

Dear Colleagues,

Optical imaging techniques are critical in the biomedical field, with numerous applications in lesion detection, diagnosis, and treatment evaluation. These imaging methods offer rich optical contrasts that provide biological information from anatomical structures to functional and molecular features, making them an essential tool for both preclinical research and clinical practice.

With the significant growth of optical imaging in recent years, we are announcing a Special Issue on advanced optical imaging for biomedicine. The focus will be on recent innovations and novel trends related to optical imaging devices, optical imaging applications in biomedicine, optical imaging theories, and interdisciplinary studies that apply optical imaging technologies. We welcome regular research articles, reviews, and short communications from research groups worldwide to share their knowledge through this Special Issue of *Optics*.

an Open Access Journal by MDPI

Editors-in-Chief

Prof. Dr. Costantino De Angelis

Department of Information
Engineering, University of
Brescia, Piazza del Mercato, 15,

Thermodynamik, Lehrstuhl für
Technische Thermodynamik,
Universität Siegen, Paul-Bonatz-
Straße 9-11, 57076 Siegen,
Germany

Message from the Editorial Board

Optics (ISSN 2673-3269) aims at establishing *Optics* as a leading journal for publishing high impact fundamental research and applications in optics field with a fast processing time and high quality service. The journal particularly welcomes both theoretical (simulation) and experimental research within our journal's scope. We encourage scientists to publish their experimental and theoretical results in as much detail as possible. So, there is no restriction on the length or pages of the papers. The full experimental details must be provided so that the results can be reproduced. Electronic files and software regarding the full details of the calculation or experimental procedure, if unable to be published in a normal way, can be deposited as supplementary electronic material.

Author Benefits

Open Access: free for readers, with **article processing charges (APC)** paid by authors or their institutions.

High Visibility: indexed within **ESCI (Web of Science)**, **Scopus**, **EBSCO**, and **other databases**.

Rapid Publication: manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 3.9 days (median values for papers published in this journal in the second half of 2023).
