### Facts about the MDPI Community

70 open access journals  
70 staff at your disposal  
4000 academic editors  
15,000 articles published  
26,000 e-mail alert subscribers  
60,000 unique authors  
150,000 academic peer-reviewers  
600,000 monthly PDF views  
2,400,000 monthly abstract views

MDPI AG  
Postfach  
CH-4005 Basel

## Call for Papers

## Call for Papers

Dear Colleagues,

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Pathogens* (ISSN 2076-0817). *Pathogens* is an international, open access journal of pathogens and pathogen-host interactions.

Manuscripts prepared in Microsoft Word or LaTeX can be submitted online to the Editorial Office at [www.mdpi.com](http://www.mdpi.com). Detailed instructions for authors are also available online: [www.mdpi.com/journal/pathogens/instructions/](http://www.mdpi.com/journal/pathogens/instructions/)

*Pathogens* is published in open access format—research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public can unlimitedly access the content for free as soon as it is published.

*Pathogens* is a new journal and publication fees are fully waived for papers submitted in 2012. However, a fee of 250 CHF may apply for those articles that need major editing and formatting and/or English editing.

We would be pleased to welcome you as one of our authors.

Editorial Office

## Aims & Scope

*Pathogens* publishes reviews, regular research papers and short notes on all aspects of pathogens and pathogen-host interactions. There is no restriction on the length of the experimental section.

Our aim is to encourage scientists to publish their experimental and theoretical research in as much detail as possible. Full experimental and/or methodical details must be provided for research articles.

The scope of *Pathogens* includes:

- identification and characterization of pathogens
- pathogen invasion and host defenses
- transmission of pathogens
- pathogen genetics and genomics
- pathogen lifecycle
- host adaptation
- pathogen Inactivation
- innate and adaptive immune responses
- molecular mechanisms of host-pathogen interaction
- vaccine and therapeutic development
- immune defense mechanisms
- veterinary infections
- cell signalling effects
- vectorology

*Pathogens* regularly publishes special issues on relevant and timely topics. Be sure to check our website for an updated list of special issues: [www.mdpi.com/journal/pathogens/](http://www.mdpi.com/journal/pathogens/)

## Open Access. What Does It Really Mean?

Open access is mainly a response to what is known as the serials crisis: yearly increasing journal subscription prices, which make subscription-based journals increasingly difficult to afford.

Many university libraries around the world have had to cancel existing subscriptions, or are unable to keep up with subscribing to new journals, because the cost of publication has risen disproportionately to their budgets.

With open access publishing, the cost of peer-review and production of an article is borne by the institute of the author by payment of a one-time flat fee. Conversely, readers and their institutes are no longer charged for accessing the journals they need.

For researchers, open access brings the convenience of immediate access to the literature that they need—no matter for which university or company they work, or whether they just want to read a paper in their spare time at home.

For authors, open access means a much wider circle of readers due to the easy access to their research papers. The interested general public is also able to access research works, giving higher transparency to the outcome of taxpayer money spent on research.
