

Emerging Pathogens in Aquaculture

Guest Editor:

Prof. Dr. Michał Marek Reichert

Department of Fish Diseases,
National Veterinary Research
Institute, 24-100 Puławy, Poland

Deadline for manuscript
submissions:

15 September 2024

Message from the Guest Editor

The purpose of this Special Issue is to encourage scientists working on emerging pathogens to present their latest research in the form of original research papers, short reports, case studies or review articles. We expect a series of publications on, inter alia, diagnostic methods, clinical symptoms, pathogenesis, methods of treatment, and pathogen–host relationships. We believe that this initiative will enable not only better diagnosis, but also a better understanding of the pathomechanisms of infectious diseases of aquatic animals.

Message from the Editor-in-Chief

The worldwide impact of infectious disease is incalculable. The consequences for human health in terms of morbidity and mortality are obvious and vast but, when infections of animals and plants are also taken into account, it is hard to imagine any other disease that has such a significant impact on our lives—on healthcare systems, on agriculture and on world economics. *Pathogens* is proud to continue to serve the international community by publishing high quality studies that further our understanding of infection and have meaningful consequences for disease intervention.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PubAg, CaPlus / SciFinder, AGRIS, and other databases.

Journal Rank: JCR - Q2 (*Microbiology*) / CiteScore - Q2 (*General Immunology and Microbiology*)
