Message from the Guest Editor

Dear Colleagues

The journal *Pharmaceuticals* will be publishing a Special Issue covering the topic, “Interferons”, and I cordially invite you to contribute an article to this volume.

Since their discovery over 50 years ago, interferons have impacted cancer research, autoimmunity, and host responses to infection. Also, a huge commercial market has developed for interferons because they became critical for treating hepatitis B and C. However, the use of interferons is changing. This Special Issue will highlight recent developments in the clinical use of these drugs (including Type I, II, and III interferons). In addition, we welcome the presentation and discussion of new preclinical models for interferons in order to offer participants a vision into the future of interferons in the clinic.
