Deadline for manuscript
submissions:

30 November 2024

Message from the Guest Editor

Dear Colleagues,

Currently, many of the drug entities entering the clinic face bioavailability issues, mainly due to poor water solubility and/or permeability, in addition to issues with physicochemical instability or degradation in the body. Polymers present an array of different backbones and functional groups, sizes, shapes, as well as mechanical and degradation properties, which have been exploited in drug delivery and targeting. Strategies for bioavailability enhancement using functionalized polymers include solid amorphous dispersions for improved solubility; chemical modification for extended blood residence and reduced or abrogated immunogenicity and antigenicity; protection from harsh pH or enzymatic degradation; as well as tailored rate and temporal/spatial drug release.

This Special Issue, Polymers Enhancing Bioavailability in Drug Delivery, 3rd Edition, aims to review the specific functional benefits granted by polymers to formulations, which are very much reliant on polymer structure and design, and result in improved drug bioavailability and therapeutic index. You are welcome to submit your papers to this Special Issue, thus contributing to this exciting field.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

Pharmaceutics (ISSN 1999-4923) is an online open access journal on the science and technology of pharmaceutics and biopharmaceutics. The scientific community, the wider community and the general public have unlimited and free access to the content as soon as a paper is published; this open access to your research ensures your findings are shared with the widest possible audience. Please consider publishing your impressive work in this high quality journal. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (*Pharmacology & Pharmacy*) / CiteScore - Q1 (*Pharmaceutical Science*)
