Message from the Guest Editors

Dear Colleagues,

Active compounds derived from natural products or synthesized compounds by planning and rational development make it possible to obtain medicines to treat a range of diseases. In this sense, the advancement in the design of pharmaceutical forms (macro, micro, and nanostructure) allows the rescue and ensures the quality, effectiveness, and safety of the product. Thus, the publication of expertise in this area will contribute to the production of new molecules that have adequate pharmacokinetic and pharmacodynamic properties, such as for the treatment of autoimmune diseases, neglected diseases, and those that still have no definite treatment. Therefore, in this Special Issue we will address aspects related to the prospecting of molecules in medicinal chemistry, pharmacological aspects, and pharmaceutical technological development.

Prof.Dr. Ana Cláudia Dantas Medeiros

Message from the Editor-in-Chief

Pharmaceutics (ISSN 1999-4923) is an online open access journal on the science and technology of pharmaceutics and biopharmaceutics. The scientific community, the wider community and the general public have unlimited and free access to the content as soon as a paper is published; this open access to your research ensures your findings are shared with the widest possible audience. Please consider publishing your impressive work in this high quality journal. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (*Pharmacology & Pharmacy*) / CiteScore - Q1 (*Pharmaceutical Science*)
