Message from the Guest Editors

Dear Colleagues,

The encapsulation of drugs in nano/micro vehicles is a tremendously challenging task that is in continuously evolving. This process provides a number of possibilities to facilitate drug protection and delivery at specific biological sites, among many other benefits. These two techniques—nano and microencapsulation—cover an enormous range of drug carriers from nanoparticles, nanospheres, nanocapsules, etc., to their micro-sized counterparts, as well as other colloidal drug delivery systems such as liposomes, micelles, nanoemulsions, and microemulsion, among others. Thus, different materials, methods of production, possibilities of surface modification, and targetability options need to be considered.

This Special Issue aims to cover different aspects of the nanoencapsulation and microencapsulation of drugs and will include papers describing the design, preparation, and characterization of nano and micro carrier-based drug delivery systems and their latest developments in this field.

Message from the Editor-in-Chief

Pharmaceutics (ISSN 1999-4923) is an online open access journal on the science and technology of pharmaceutics and biopharmaceutics. The scientific community, the wider community and the general public have unlimited and free access to the content as soon as a paper is published; this open access to your research ensures your findings are shared with the widest possible audience. Please consider publishing your impressive work in this high quality journal. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Pharmaceutical Science)
