Message from the Guest Editor

The Special Issue addresses innovative strategies to image infarcted myocardium or to deliver active principles into diseased tissue.

At present, patients with myocardial infarction benefit from diverse strategies of revascularization. However, revascularization often leads to new cellular and tissue injuries globally referred to as ischemia/reperfusion (I/R) injuries. Some strategies are clinically applied to reduce these I/R injuries. However, these strategies do not sufficiently avert cardiomyocyte losses and remodeling of the cardiac tissue, which ultimately leads to heart failure.

In this context, innovative strategies have found their place to achieve the targeted delivery of active principle while further increasing the sensitivity and selectivity of the targets for the cardiac imaging of lesions.

For this Special Issue, we invite the submission of manuscripts covering the synthesis and characterization of targeting systems for the imaging and/or therapy of ischemic myocardial tissue (nanoparticles, liposomes, extracellular vesicles, etc.). This includes physical and chemical characterization, in vitro and in vivo assessments, and toxicological assessment strategies.

Message from the Editor-in-Chief

Pharmaceutics (ISSN 1999-4923) is an online open access journal on the science and technology of pharmaceutics and biopharmaceutics. The scientific community, the wider community and the general public have unlimited and free access to the content as soon as a paper is published; this open access to your research ensures your findings are shared with the widest possible audience. Please consider publishing your impressive work in this high quality journal. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Pharmaceutical Science)
