Message from the Guest Editors

Dear Colleagues,

Nanoemulsions consist of nanoscale oil/water dispersions stabilized by an appropriate surfactant system in which the drug is incorporated into the oil core and/or adsorbed at the interface. They emerged from the parenteral emulsions due to their biocompatibility, stability, ability to reduce the toxicity of cytotoxic drugs, and ability to protect drugs from degradation.

Nanoemulsions can be prepared by simple and easy to scale up techniques that allow solubilizing high quantities of hydrophobic compounds. With specific excipients, such as surfactants and polymers, physicochemical properties are improved providing gains in mucoadhesiveness, permeability, and interaction with biological membranes. In this context, the advantages of these relatively simple colloidal systems have expanded their use from the parenteral to other administration routes, such as oral, transdermal, ocular, and nasal.

Taking into consideration the advantages of nanoemulsions, for this Special Issue, original research and review articles addressing recent advances of nanoemulsions formulations for drugs and phytochemicals delivery by different routes of administration are welcomed.

Message from the Editor-in-Chief

Pharmaceutics (ISSN 1999-4923) is an online open access journal on the science and technology of pharmaceutics and biopharmaceutics. The scientific community, the wider community and the general public have unlimited and free access to the content as soon as a paper is published; this open access to your research ensures your findings are shared with the widest possible audience. Please consider publishing your impressive work in this high quality journal. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (*Pharmacology & Pharmacy*) / CiteScore - Q1 (*Pharmaceutical Science*)
