Deadline for manuscript submissions: closed (16 October 2018)

### Message from the Guest Editors

Dear Colleagues,

Today, the development of new drugs is still time consuming, extremely costly, and suffers from high attrition rates. One of the biggest bottlenecks in the early phase of drug development is the lack of high-throughput approaches for preclinical pharmacokinetics (PK) screening. Nevertheless, this area has been greatly improved over the past decade because of the revolutionary changes in bioanalytical methods, in particular, with the development of LC-MS/MS platform. New preclinical PK screening approaches, including cassette dosing PK, cassette analysis, snapshot PK and rapid PK have been proposed and tested. The progress of these PK technologies could significantly accelerate the process of drug discovery. They can also be widely applied in different stages of drug development to eliminate weak candidates

This Special Issue on "Preclinical Pharmacokinetics and Bioanalysis" aims to highlight the latest development technologies and to inspire future research in this exciting area.

### Message from the Editor-in-Chief

*Pharmaceutics* (ISSN 1999-4923) is an online open access journal on the science and technology of pharmaceutics and biopharmaceutics. The scientific community, the wider community and the general public have unlimited and free access to the content as soon as a paper is published; this open access to your research ensures your findings are shared with the widest possible audience. Please consider publishing your impressive work in this high quality journal. We would be pleased to welcome you as one of our authors.

# **Author Benefits**

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (*Pharmacology & Pharmacy*) / CiteScore - Q1 (*Pharmaceutical Science*)
