Message from the Editor-in-Chief

Since its foundation in 2009, Polymers has developed into an internationally renowned, extremely successful open access journal. The editorial team and the editorial board dedicatedly combine open-access publishing and high-quality rigorous peer reviewing. The performance of the journal has proven this strategy to be well-suited and highly successful. This is reflected in the increasing impact factor of Polymers, the most recent one being 2.944.

I would like to invite you to contribute to the success of the journal by sending us your high quality research papers. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access
Unlimited and free access for readers

Reliable Service
Thorough peer-review and professional publication

Affordable Price
Max. APC 1400 CHF and flexible discount policy, no charge for extra page or color

High Speed
58 days from submission to publication (2016 average)

Coverage by Leading Indexing Services
Science Citation Index Expanded, Polymer Library, Compendex, Scopus
More Information about This Journal

Aims and Scope

*Polymers* (ISSN 2073-4360) is an international open access journal of polymer science. It provides an interdisciplinary forum for research papers, short communications and review papers which advance the fields of: (i) polymerization methods; (ii) theory, simulation, and modeling; (iii) understanding of new physical phenomena; (iv) advances in characterization techniques; and (v) harnessing of self-assembly and biological strategies for producing complex multifunctional structures. Our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible. The full experimental details must be provided so that the results can be reproduced; hence there is no restriction on the length of the papers.

The journal is covered by leading databases, including Science Citation Index Expanded (Web of Science), Polymer Library, Compendex (EI), Scopus and other databases.
