Message from the Guest Editor

Dear Colleagues,

Click chemistry, in its various guises, has, arguably, had a transformational impact on facile approaches to macromolecular modification. While the versatility and (bio)orthogonality of the Cu-catalyzed alkyne-azide reaction has been repeatedly demonstrated many other 'click' reactions are still very much in their infancy with respect to applications in macromolecular synthesis and modification.

This special issue of Polymers aims to highlight recent advances in the applications of 'click' chemistry in macromolecular science and will serve as a primary source for both new and experienced practitioners of these remarkable chemistries.

Prof. Dr. Andrew B. Lowe

Message from the Editor-in-Chief

Since its foundation in 2009, *Polymers* has developed into an internationally renowned, extremely successful open access journal. The editorial team and the editorial board dedicatedly combine open-access publishing and high-quality rigorous peer reviewing. The performance of the journal has proven this strategy to be well-suited and highly successful. This is reflected in the increasing impact factor of *Polymers*, the most recent one being 5.0.

I would like to invite you to contribute to the success of the journal by sending us your high quality research papers. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubMed, PMC, FSTA, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank: JCR - Q1 (*Polymer Science*) / CiteScore - Q1 (*Polymers and Plastics*)
