

New Advances in Nanomaterials for Biomedical Diagnostics and Therapy

Guest Editor:

Dr. Hong Niu

Mckelvey School of Engineering,
Washington University in St.
Louis, St. Louis, MO 63130, USA

Deadline for manuscript
submissions:

30 June 2024

Message from the Guest Editor

In the dynamic landscape of biomedical research, nanomedicine captivates global attention for its remarkable capabilities. The flexibility of nanomaterials to couple with various substances opens doors to a realm of possibilities. Whether through chemical conjugation, physical encapsulation, or adsorption, these loaded nanosubstances pave the way for the targeted delivery of drugs, chemotherapeutic agents, imaging substances, or vital biological entities.

This Special Issue is dedicated to showcasing a collection of studies centered on the latest advancements in nanomaterials tailored for diverse applications in biomedical tracking, detection, and treatment across various scenarios. Researchers from a wide array of disciplines are encouraged to submit manuscripts, exploring areas such as:

- Development of nanomaterials for diagnosing cancer and chronic diseases.
- Therapeutic treatments using both loaded and non-loaded nanomaterials.
- Integration of nanotechnology with other methods for tissue regeneration.
- Development of nanomaterials for immunization and vaccine production.
- Innovative approaches to synthesize, fabricate, and characterize nanomaterials.

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Giancarlo Cravotto

Department of Drug Science and
Technology, University of Turin,
Via P. Giuria 9, 10125 Turin, Italy

Message from the Editor-in-Chief

Processes (ISSN 2227-9717) provides an advanced forum for process/system-related research in chemistry, biology, material, energy, environment, food, pharmaceutical, manufacturing and allied engineering fields. The journal publishes regular research papers, communications, letters, short notes and reviews. Our aim is to encourage researchers to publish their experimental, theoretical and computational results in as much detail as necessary. There is no restriction on paper length or number of figures and tables.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank: JCR - Q2 (*Engineering, Chemical*) / CiteScore - Q2 (*Chemical Engineering (miscellaneous)*)
