Message from the Guest Editors

The specific purpose of this project is to: (1) comprehensively review the research progress in the exploration, development, and utilization of coal-based natural gas; (2) solve the bottleneck problem encountered in deep coalbed methane exploration and development; (3) overcome the obstacles of CO₂ geological storage and efficient mining of coal-based gas.

Topics of interest for publication include, but are not limited to:

- Enrichment, accumulation, and evolution of coal-measure gas;
- Evaluation of coal-measure gas reservoirs;
- Drainage performance and reservoir parameter variation;
- Gas injection (CO₂/N₂) stimulation technology;
- Optimal evaluation technology for CO₂ geological storage;

Message from the Editor-in-Chief

Processes (ISSN 2227-9717) provides an advanced forum for process/system-related research in chemistry, biology, material, energy, environment, food, pharmaceutical, manufacturing and allied engineering fields. The journal publishes regular research papers, communications, letters, short notes and reviews. Our aim is to encourage researchers to publish their experimental, theoretical and computational results in as much detail as necessary. There is no restriction on paper length or number of figures and tables.
