

Advances in New and Renewable Fuel for Internal Combustion Engines

Guest Editors:

Dr. Elkelawy Medhat

Faculty of Engineering, Tanta
University, Tanta 31527, Egypt

**Dr. Hagar Alm-Eldin
Bastawissi**

Mechanical Power Engineering
Department, Faculty of
Engineering, Tanta University,
Tanta 31733, Egypt

Deadline for manuscript
submissions:

15 July 2024

Message from the Guest Editors

Recently, the search for new and renewable sources of fuel has intensified. This is after the agreement of many countries and institutions to take steps to preserve the environment by reducing emissions and reducing fossil fuel consumption. As such, work has been performed to raise the efficiency of combustion systems' performance, especially in the application of internal combustion engines. To achieve this goal, all research authorities sought to maximize the production of alternative fuels that can be used in internal combustion engines without making fundamental changes in the original fuel systems. The production of biofuels from used edible oils, the cultivation and harvesting of algae, and the fermentation of agricultural residues are among the most important research directions in this regard. In this context, researchers are working through innovative mathematical and numerical methods in their research with the use of nanometric material technologies in order to achieve the best performance parameters in internal combustion engine systems.

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Giancarlo Cravotto

Department of Drug Science and
Technology, University of Turin,
Via P. Giuria 9, 10125 Turin, Italy

Message from the Editor-in-Chief

Processes (ISSN 2227-9717) provides an advanced forum for process/system-related research in chemistry, biology, material, energy, environment, food, pharmaceutical, manufacturing and allied engineering fields. The journal publishes regular research papers, communications, letters, short notes and reviews. Our aim is to encourage researchers to publish their experimental, theoretical and computational results in as much detail as necessary. There is no restriction on paper length or number of figures and tables.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank: JCR - Q2 (*Engineering, Chemical*) / CiteScore - Q2 (*Chemical Engineering (miscellaneous)*)
