Message from the Guest Editors

Dear Colleagues,

In recent decades, pollutants from human activities have become ubiquitous in the environment and have degraded the quality of the water, soil, and air worldwide, harming all forms of life on Earth. Therefore, there is an urgent need to contain and reduce their presence in the environment. This Special Issue is intended to provide a forum for research on the treatment and remediation of various organic and inorganic environmental pollutants. Articles are sought that address various physical, chemical, and biological processes and their combination for the treatment and remediation of soils, sediments, and water to achieve maximum recovery and to reuse contaminants. Analysis of the process of treatment and remediation, selecting the treatment strategy to achieve a circular economy, zero-waste discharge and energy saving studies, analysis of all influencing factors that can affect process performance and efficiency, kinetics and equilibrium studies, and modelling the obtained data are especially welcome.

Deadline for manuscript
submissions:

30 November 2024

Message from the Editor-in-Chief

Processes (ISSN 2227-9717) provides an advanced forum for process/system-related research in chemistry, biology, material, energy, environment, food, pharmaceutical, manufacturing and allied engineering fields. The journal publishes regular research papers, communications, letters, short notes and reviews. Our aim is to encourage researchers to publish their experimental, theoretical and computational results in as much detail as necessary. There is no restriction on paper length or number of figures and tables.

Author Benefits

Open Access: free for readers, with **article processing charges (APC)** paid by authors or their institutions.

High Visibility: indexed within **Scopus**,
SCIE (Web of Science), **Ei Compendex**, **Inspecc**, **AGRIS**, and **other databases**.

Journal Rank: JCR - Q2 (*Engineering, Chemical*) / CiteScore - Q2 (*Chemical Engineering (miscellaneous)*)
