Design and Control of Complex and Intelligent Systems

Guest Editor:

Prof. Dr. Claudio Urrea

Electrical Engineering
Department, Faculty of
Engineering, University of
Santiago of Chile, Las Sophoras
165, Estación Central, Santiago
9170124, Chile

Deadline for manuscript
submissions:

closed (18 May 2024)

Message from the Guest Editor

Complex dynamic systems and intelligent systems are designed to learn, adapt, and make autonomous decisions in complex and changing environments. Therefore, they play a crucial role in various fields, including industry, biomedical engineering, agriculture, and space exploration, among others. Nowadays, due to the natural trend towards automation, their applications have expanded. However, complex dynamic systems and intelligent systems must be well-designed and controlled to provide the required performance. This way, these systems can increase their performance, operational safety, and contribute to energy efficiency, which has become a major concern in the world. Meeting the growing demand for energy while reducing costs, caring for sustainability and minimizing carbon emissions.

This special issue on "Design and Control of Complex and Intelligent Systems" includes high-quality papers focusing on the latest novel developments in modeling, simulation, design, control, optimization, application, and maintenance of all types of complex dynamic systems and intelligent systems.

Special Issue

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Giancarlo Cravotto

Department of Drug Science and
Technology, University of Turin,
Via P. Giuria 9, 10125 Turin, Italy

Message from the Editor-in-Chief

Processes (ISSN 2227-9717) provides an advanced forum for process/system-related research in chemistry, biology, material, energy, environment, food, pharmaceutical, manufacturing and allied engineering fields. The journal publishes regular research papers, communications, letters, short notes and reviews. Our aim is to encourage researchers to publish their experimental, theoretical and computational results in as much detail as necessary. There is no restriction on paper length or number of figures and tables.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank: JCR - Q2 (*Engineering, Chemical*) / CiteScore - Q2 (*Chemical Engineering (miscellaneous)*)
