Preparation, Characterization and Application of Heterogeneous Catalysts

Guest Editor:

Prof. Dr. Wladimir Reschetilowski

Fakultät Chemie und
Lebensmittelchemie, Technische
Universität Dresden,
Helmholtzstraße 14, 01069
Dresden, Germany

Deadline for manuscript
submissions:

25 June 2024

Message from the Guest Editor

Heterogeneously catalysed reactions are playing an increasingly important role in modern chemistry. In many areas of environmental and climate protection as well as sustainable energy supply, heterogeneous catalysts are used to make chemical processes faster, safer, more environmentally friendly and/or cheaper. As a result, the scientific search for more effective heterogeneous catalysts remains a constant task for application-oriented research. This includes further research into traditional and special methods for the preparation of metallic, oxide and multifunctional catalyst systems, the possibilities of their textural, structural and surface chemical characterization, the investigation of their activity, selectivity and long-term stability as well as the discovery of the physical–chemical aspects their mode of action. This Special Issue offers a suitable platform for catalysis researchers to report on the latest scientific findings and experiences in the development and practical use of heterogeneous catalysts.

Special Issue

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Giancarlo Cravotto

Department of Drug Science and
Technology, University of Turin,
Via P. Giuria 9, 10125 Turin, Italy

Message from the Editor-in-Chief

Processes (ISSN 2227-9717) provides an advanced forum for process/system-related research in chemistry, biology, material, energy, environment, food, pharmaceutical, manufacturing and allied engineering fields. The journal publishes regular research papers, communications, letters, short notes and reviews. Our aim is to encourage researchers to publish their experimental, theoretical and computational results in as much detail as necessary. There is no restriction on paper length or number of figures and tables.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank: JCR - Q2 (*Engineering, Chemical*) / CiteScore - Q2 (*Chemical Engineering (miscellaneous)*)
