Message from the Guest Editors

This Special Issue entitled "Advances in Pharmacodynamics and Drug Design Process" intends to present both reviews and original studies regarding research on the drug design process and also the mechanism of action of different substances by using experimental pharmacology methods.

The topics in this Special Issue include but are not limited to:

- Experimental pharmacology in drug design
- Clinical pharmacology in drug design
- Neuropsychopharmacology
- Pharmacology of pain
- Pharmacology in metabolic diseases

Message from the Editor-in-Chief

Processes (ISSN 2227-9717) provides an advanced forum for process/system-related research in chemistry, biology, material, energy, environment, food, pharmaceutical, manufacturing and allied engineering fields. The journal publishes regular research papers, communications, letters, short notes and reviews. Our aim is to encourage researchers to publish their experimental, theoretical and computational results in as much detail as necessary. There is no restriction on paper length or number of figures and tables.
