Message from the Guest Editor

The advent of artificial intelligence (AI) in healthcare has been a breakthrough, reshaping the way we diagnose, treat, manage, and monitor patients. The rise of data in healthcare and its complexity means that AI will increasingly be applied within the field. AI in healthcare is emerging in several ways, such as finding new links between genetic code, powering robots that assist in surgery, automating administrative tasks, personalizing treatment options, and much more.

This Special Issue aims to publish articles in the interdisciplinary area of healthcare and AI. This includes AI research on disease prevention, early diagnosis, diagnosis, treatment, etc. The topics include but are not limited to:

- AI for personalized and predictive medicine;
- Natural language processing in healthcare;
- Computational genetics and genomics;
- Data science and big data analytics for healthcare;
- AI for public health and epidemiology;
- Computation drug discovery and cheminformatics;
- AI-based clinical decision making;
- Medical knowledge engineering;
- Machine learning and deep learning in healthcare;
- AI for medical imaging;
- The future of AI in healthcare.

an Open Access Journal by MDPI

Editor-in-Chief

Message from the Editor-in-Chief

Processes (ISSN 2227-9717) provides an advanced forum for process/system-related research in chemistry, biology, material, energy, environment, food, pharmaceutical, manufacturing and allied engineering fields. The journal publishes regular research papers, communications, letters, short notes and reviews. Our aim is to encourage researchers to publish their experimental, theoretical and computational results in as much detail as necessary. There is no restriction on paper length or number of figures and tables.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank: JCR - Q2 (*Engineering, Chemical*) / CiteScore - Q2 (*Chemical Engineering (miscellaneous)*)
