Message from the Guest Editors

The goal of this Research Topic is to explore scientific models, methods and technologies that demonstrate both solid theoretical development and practical importance in order to implement low-carbon design and manufacturing. The central theme of the proposed Research Topic is on the low-carbon design and manufacturing processes, where information technology-based modelling, analysis, control and optimization are the focus areas, with broad aspects and issues also being explored. Topics to be covered include, but are not limited to, the following:

- Low-carbon product design method
- Low-carbon manufacturing
- Low-carbon manufacturing process planning
- Low-carbon workshop scheduling
- Low-carbon design method for remanufacturing
- Low-carbon remanufacturing process planning
- Low-carbon logistics
- Low-carbon reverse supply chain

Deadline for manuscript
submissions:

20 June 2024

an Open Access Journal by MDPI

Message from the Editor-in-Chief

Processes (ISSN 2227-9717) provides an advanced forum for process/system-related research in chemistry, biology, material, energy, environment, food, pharmaceutical, manufacturing and allied engineering fields. The journal publishes regular research papers, communications, letters, short notes and reviews. Our aim is to encourage researchers to publish their experimental, theoretical and computational results in as much detail as necessary. There is no restriction on paper length or number of figures and tables.

Author Benefits

Open Access: free for readers, with **article processing charges (APC)** paid by authors or their institutions.

High Visibility: indexed within **Scopus**,
SCIE (Web of Science), **Ei Compendex**, **Inspec**, **AGRIS**, and **other databases**.

Journal Rank: JCR - Q2 (*Engineering, Chemical*) / CiteScore - Q2 (*Chemical Engineering (miscellaneous)*)
