# **Eco-Friendly Advanced Processes for Efficient Removal of Emerging Contaminants from the Environment**

Guest Editor

#### Dr. Yassine Kadmi

Faculty of Sciences and Technologies, University of Lille, Lille, France

Deadline for manuscript submissions:

closed (10 April 2024)

## **Message from the Guest Editor**

Emerging contaminants are a large group of chemical compounds found in the environment due to regular human activities such as domestic, agricultural, and industrial processes. These pollutants' persistence and long-range mobility have harmful consequences for ecosystems and human health, even at low concentrations. Over the past decades, anthropogenic compounds such as drugs, pesticides, endocrine disruptors, and dyes in the environment have become a global issue of increasing concern. As a result, there is a pressing need to treat these toxic pollutants via appropriate treatment options.

We invite all the participants to submit original and scientific studies related to, but not limited to, the following topics:

- Environmental and Green Processes
- Science, Technology, and Sustainability Engineering
- Water/Wastewater Treatment, Process Technology, and Recycling
- Treatment of Polluted Air and Soil
- New Nanomaterials for Processes
- Electrochemical Oxidation Processes
- Energy Analysis of Processes

Department of Drug Science and Technology, University of Turin, Via P. Giuria 9, 10125 Turin, Italy

# **Message from the Editor-in-Chief**

Processes (ISSN 2227-9717) provides an advanced forum for process/system-related research in chemistry, biology, material, energy, environment, food, pharmaceutical, manufacturing and allied engineering fields. The journal publishes regular research papers, communications, letters, short notes and reviews. Our aim is to encourage researchers to publish their experimental, theoretical and computational results in as much detail as necessary. There is no restriction on paper length or number of figures and tables.

### **Author Benefits**

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus,

SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

**Journal Rank:** JCR - Q2 (*Engineering, Chemical*) / CiteScore - Q2 (*Chemical Engineering (miscellaneous*))
