Engineering and Catalysis,
Faculty of Chemical Engineering
and Technology, University of
Zagreb, 10000 Zagreb, Croatia

Message from the Guest Editor

This Special Issue on "Catalysis in Advanced Oxidation Processes for Environmental Remediation", highlighting recent progress in the field, aims to provide answers to many remaining questions that need to be addressed to meet stringent pollutant emission standards in a cost-effective and efficient manner. Topics of interest include, but are not limited to:

Deadline for manuscript
submissions:

31 May 2024

- Design of photocatalysts and composite materials for the degradation of pollutants present in wastewater, waste gases, and the atmosphere;
- Photocatalytic water splitting, photoreforming of biomass and plastic waste;
- Exploiting potential of the in situ characterization techniques, molecular modeling, and theoretical simulations for a better understanding of the mechanisms of pollutants degradation;
- Design, analysis, and modeling of photocatalytic reactors, laboratory- and pilot-plant scale photoreactors.

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Giancarlo Cravotto

Department of Drug Science and
Technology, University of Turin,
Via P. Giuria 9, 10125 Turin, Italy

Message from the Editor-in-Chief

Processes (ISSN 2227-9717) provides an advanced forum for process/system-related research in chemistry, biology, material, energy, environment, food, pharmaceutical, manufacturing and allied engineering fields. The journal publishes regular research papers, communications, letters, short notes and reviews. Our aim is to encourage researchers to publish their experimental, theoretical and computational results in as much detail as necessary. There is no restriction on paper length or number of figures and tables.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank: JCR - Q2 (*Engineering, Chemical*) / CiteScore - Q2 (*Chemical Engineering (miscellaneous)*)
