Research on Polymer Processing Technology

Guest Editors:

Prof. Dr. Xingyuan Huang

College of Advanced
Manufacturing, Nanchang
University, Nanchang 330031,
China

Prof. Dr. Mengshan Li

College of Physics and Electronic
Information, Gannan Normal
University, Ganzhou 341000,
China

Dr. Shiyu Jiang

Jiangxi Province Key Laboratory
of Precision Drive & Control,
Nanchang Institute of
Technology, Nanchang 330099,
China

Deadline for manuscript
submissions:

30 June 2024

Message from the Guest Editors

Dear Colleagues,

With the steady improvement of people's living quality and level, the pace of industrialization development is constantly advancing; therefore, the social development of process technology has put forward more stringent standards and requirements. Polymer materials cannot only be widely used, but can also realize the steady improvement of work efficiency. Polymer material refers to a polymer composition and polymer material, is a relatively high-molecular-weight compound construction of new materials, the structure of the material itself has significant modification, whether it is malleable or plasticity is relatively strong, so the material can be processed and adjusted more reasonably.

This Special Issue on “Recovery and Utilization of Polymeric Materials” aims to cover recent advances in the development and application of processing and recycling of polymer materials.

Special Issue

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Giancarlo Cravotto

Department of Drug Science and
Technology, University of Turin,
Via P. Giuria 9, 10125 Turin, Italy

Message from the Editor-in-Chief

Processes (ISSN 2227-9717) provides an advanced forum for process/system-related research in chemistry, biology, material, energy, environment, food, pharmaceutical, manufacturing and allied engineering fields. The journal publishes regular research papers, communications, letters, short notes and reviews. Our aim is to encourage researchers to publish their experimental, theoretical and computational results in as much detail as necessary. There is no restriction on paper length or number of figures and tables.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank: JCR - Q2 (*Engineering, Chemical*) / CiteScore - Q2 (*Chemical Engineering (miscellaneous)*)
