Message from the Guest Editors

The recycling and utilization of agricultural wastes are considered to represent an important step in environmental protection, energy structure, agricultural development, and cleaner production. The use of agricultural waste as a feedstock for the bio-refinery, bio-convention, and composting approach emerges to be an eco-friendly process for the production of biofuel, value-added bio-products, bio-fertilizers, and intensifying energy security.

In this Special Issue, we welcome, but place no limit on, contributions on the following topics:

1. Bio-conversion from agricultural waste to the high-value production of bioenergy and active bio-products.
2. Green biotechnologies for recycling and utilization of agricultural waste.
3. Advance processes for bio-conversion of agricultural waste.
4. Innovative composting process for agricultural waste treatment.

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank: CiteScore - Q2 (Chemical Engineering (miscellaneous))
