# **Modeling and Optimization of Photovoltaic Power Systems**

Guest Editors:

#### Dr. Andy Walker

National Renewable Energy Laboratory, Golden, CO 80401, USA

#### Dr. Joshua S. Stein

Sandia National Laboratory, Albuquerque, NM 87123, USA

Deadline for manuscript submissions: **31 December 2024** 

### **Message from the Guest Editors**

Dear Colleagues,

The aim of this Special Issue is to advance the state of the art in the modeling and optimization of photovoltaic power systems.

The scope and approach for this Special Issue is to present improvements in the fundamental models and mathematical foundations of time-series simulation, thus enabling solutions to tomorrow's problems. This Special Issue seeks to address these problems by investigating: high-resolution time-series data (identification of needed timescale; algorithms at the edge; communication bandwidth; and parallel processing); the distribution function or stochastic modeling (the distribution function of values of interest within each time step duration); machine learning approaches (a neural network is trained and used to estimate phenomena that occur within the duration of each time step); a mathematical model of physical phenomena (transient model or physical scales); variable time step simulations (adjust the time step according to the time scale of phenomena and resample intervals); and other significant advancements in PV system modeling and optimization.

### **Editor-in-Chief**

#### Prof. Dr. Giancarlo Cravotto

Department of Drug Science and Technology, University of Turin, Via P. Giuria 9, 10125 Turin, Italy

### Message from the Editor-in-Chief

*Processes* (ISSN 2227-9717) provides an advanced forum for process/system-related research in chemistry, biology, material, energy, environment, food, pharmaceutical, manufacturing and allied engineering fields. The journal publishes regular research papers, communications, letters, short notes and reviews. Our aim is to encourage researchers to publish their experimental, theoretical and computational results in as much detail as necessary. There is no restriction on paper length or number of figures and tables.

# **Author Benefits**

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions. **High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases. **Journal Rank:** JCR - Q2 (*Engineering, Chemical*) / CiteScore - Q2 (*Chemical Engineering* (miscellaneous))
