Message from the Guest Editors

This Special Issue aims to explore innovative technologies and advancements in harnessing the power of wind and ocean waves to generate clean and sustainable energy. We shall delve into the principles, engineering, and applications of wind turbines and wave energy converters. With insights from leading researchers, industry experts, and policymakers, we will explore the latest developments, challenges, and solutions with the potential to maximize the effectiveness and impact of these technologies.

The scope of this Special Issue includes, but is not limited to, the following topics:

- The design and optimization of wind turbines for various geographical locations;
- The recent advancements in turbine blade materials, control systems, and grid integration;
- The development and utilization of wave energy converters;
- Evaluation of different device configurations, connected electrical networks, and effective energy storage solutions;
- Other related topics

Deadline for manuscript
submissions:
closed (31 March 2025)

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes*. *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with **article processing charges (APC)** paid by authors or their institutions.

High Visibility: indexed within **Scopus**,
SCIE (Web of Science), **Ei Compendex**, **Inspec**, **AGRIS**, and **other databases**.

Journal Rank: CiteScore - Q2 (Chemical Engineering (miscellaneous))
