### Message from the Guest Editor

Dear Colleagues,

Recently, interest in the application of microbiology in agriculture has focused on pesticidal, herbicidal, insecticidal, and nematocidal activity. However, these have not been widely applied in agriculture to date because of certain requirements that must first be met. The association of microbes with specific diseases is also very important, and studying this association has led to great advances and discoveries in the healthcare pharmaceutical and medical industry, from biologics to devices. Hence, studies on the innovative application of next-generation microbiology in agriculture and medicine are both expected and encouraged.

It is our pleasure to invite you to contribute your latest research work to our journal's upcoming Special Issue.

## Message from the Editor-in-Chief

*Processes* (ISSN 2227-9717) provides an advanced forum for process/system-related research in chemistry, biology, material, energy, environment, food, pharmaceutical, manufacturing and allied engineering fields. The journal publishes regular research papers, communications, letters, short notes and reviews. Our aim is to encourage researchers to publish their experimental, theoretical and computational results in as much detail as necessary. There is no restriction on paper length or number of figures and tables.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

**Journal Rank:** JCR - Q2 (*Engineering, Chemical*) / CiteScore - Q2 (*Chemical Engineering (miscellaneous)*)
