

Multifunctional Nanomaterials for Energy: Synthesis, Characteristics, and Applications

Guest Editors:

Dr. Jih-Hsin Liu

Dr. Chia-Yi Huang

Dr. Lakshmanan Saravanan

Dr. Jun-Hong Weng

Deadline for manuscript
submissions:

31 December 2024

Message from the Guest Editors

The objective of this Special Issue is to encompass the latest research in the domain of multifunctional nanomaterials for energy applications. This encompasses the synthesis processes of nanomaterials, their characteristics, their properties pertaining to specific energy forms, and their applications. The source materials could range from semiconductors, carbon, and composites to other materials applicable in the energy sector. Thus, this Special Issue will particularly emphasize solutions provided by new types of nanomaterials and the judicious use of alternative materials at a smaller scale to enhance the efficiency of energy generation or collection.

Keywords :

- multifunctional composites
- energy composites
- sustainable materials
- semiconductor materials
- carbon materials

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Giancarlo Cravotto

Department of Drug Science and
Technology, University of Turin,
Via P. Giuria 9, 10125 Turin, Italy

Message from the Editor-in-Chief

Processes (ISSN 2227-9717) provides an advanced forum for process/system-related research in chemistry, biology, material, energy, environment, food, pharmaceutical, manufacturing and allied engineering fields. The journal publishes regular research papers, communications, letters, short notes and reviews. Our aim is to encourage researchers to publish their experimental, theoretical and computational results in as much detail as necessary. There is no restriction on paper length or number of figures and tables.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank: JCR - Q2 (*Engineering, Chemical*) / CiteScore - Q2 (*Chemical Engineering (miscellaneous)*)
