submissions:

21 July 2024

Message from the Guest Editor

Reservoir characterization and modeling is a crucial step in the hydrocarbon exploration and development process. It involves the acquisition, integration, and analysis of various types of data to build a comprehensive understanding of a reservoir and its properties. Accurate reservoir characterization and modeling can lead to improved reservoir performance, and ultimately, better economic outcomes.

This Special Issue welcomes original research articles, review articles, and case studies related to reservoir characterization and modeling. Topics of interest include, but are not limited to:

- Geological modeling;
- Geophysical characterization;
- Petrophysical properties and analysis;
- Reservoir simulation and modeling;
- Uncertainty and risk analysis;
- Enhanced oil recovery methods.

an Open Access Journal by MDPI

Technology, University of Turin,
Via P. Giuria 9, 10125 Turin, Italy

Message from the Editor-in-Chief

Processes (ISSN 2227-9717) provides an advanced forum for process/system-related research in chemistry, biology, material, energy, environment, food, pharmaceutical, manufacturing and allied engineering fields. The journal publishes regular research papers, communications, letters, short notes and reviews. Our aim is to encourage researchers to publish their experimental, theoretical and computational results in as much detail as necessary. There is no restriction on paper length or number of figures and tables.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank: JCR - Q2 (*Engineering, Chemical*) / CiteScore - Q2 (*Chemical Engineering (miscellaneous)*)
