## Processes of Pollution Control and Resource Utilization

Guest Editors:

**Prof. Dr. Wei Li**

Department of Chemical and  
Biological Engineering, Zhejiang  
University, No. 38 Zheda Rd.,  
Hangzhou 310013, China

**Dr. Yinfeng Xia**

College of Water Conservancy &  
Environmental Engineering,  
Zhejiang University of Water  
Resources and Electric Power,  
Hangzhou 310018, China

Deadline for manuscript  
submissions:

**closed (20 September 2023)**

### Message from the Guest Editors

Material migration, material transformation, energy conversion, and energy transmission are all basic processes of pollution control and resource utilization. By regulating certain key steps in these processes, researchers can break through bottlenecks, improve efficiency, and optimize reaction systems. With the rapid development of pollution control technology, various new reactors, materials, and concepts are springing up. Although the technologies are varied, the underlying principles and bottlenecks may be familiar. Exploring the chemical, biological, and interface processes behind these new avenues has important guiding significance for the optimization and development of similar technologies.

This Special Issue, “Processes of Pollution Control and Resource Utilization”, seeks high-quality works focusing on the latest novel advances in the research of chemical, biological, and interface processes of pollution control and resource utilization.

## Editor-in-Chief

### **Prof. Dr. Giancarlo Cravotto**

Department of Drug Science and  
Technology, University of Turin,  
Via P. Giuria 9, 10125 Turin, Italy

## Message from the Editor-in-Chief

*Processes* (ISSN 2227-9717) provides an advanced forum for process/system-related research in chemistry, biology, material, energy, environment, food, pharmaceutical, manufacturing and allied engineering fields. The journal publishes regular research papers, communications, letters, short notes and reviews. Our aim is to encourage researchers to publish their experimental, theoretical and computational results in as much detail as necessary. There is no restriction on paper length or number of figures and tables.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

**Journal Rank:** JCR - Q2 (*Engineering, Chemical*) / CiteScore - Q2 (*Chemical Engineering (miscellaneous)*)
