Message from the Guest Editors

This Special Issue on “Systematic Design, Testing and Development of in Vitro Diagnostic Instruments” aims to gather outstanding research and comprehensive coverage of all aspects related to the design, testing and development technologies of in vitro diagnostic instruments, covering a wide range of multi-domain methods to improve the intelligence and overall performance of in vitro diagnostic instruments. This Special Issue will bring together high-quality research articles on different aspects of systematic design, testing and development technologies of in vitro diagnostic instruments, including the current status and remaining challenges. Topics include, but are not limited to:

- Systematic design theories and methods of in vitro diagnostic instruments;
- Test standards, procedures and methods of in vitro diagnostic instruments;
- Software and hardware integrated development methods of in vitro diagnostic instruments.

an Open Access Journal by MDPI

Prof. Dr. Giancarlo Cravotto

Department of Drug Science and
Technology, University of Turin,
Via P. Giuria 9, 10125 Turin, Italy

Message from the Editor-in-Chief

Processes (ISSN 2227-9717) provides an advanced forum for process/system-related research in chemistry, biology, material, energy, environment, food, pharmaceutical, manufacturing and allied engineering fields. The journal publishes regular research papers, communications, letters, short notes and reviews. Our aim is to encourage researchers to publish their experimental, theoretical and computational results in as much detail as necessary. There is no restriction on paper length or number of figures and tables.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank: JCR - Q2 (*Engineering, Chemical*) / CiteScore - Q2 (*Chemical Engineering (miscellaneous)*)
